How To Print Recharge Card in Nigeria Using VMTECH PIN EXTRACTOR Compiled By VM Technologies LTD. To Get The Software, Kindly Download it at

www.vmtechonline.com

#### ABOUT VMTECH PIN EXTRACTOR

"VM Tech Pin Extractor" software enables everyone to print recharge voucher of all networks (MTN, 9mobile, Glo, Airtel, Visafone and Starcomms) using a computer or phone and printer. It works with e-pins purchased From Our Company and other e-pin dealers in Nigeria. (We sell cheapest price of e-pin in Nigeria)

"VM Tech Pin Extractor" has a user friendly interface with easy-to-use modules that even a novice will understand.

## STEP 1

Buy e-pins you want to print from us and save the file somewhere on your computer. You can create a PIN folder in your local disk-C of your PC or flash drive and save it there.

The e-pins might be encrypted in text or PDF files. It would be protected with password for security reasons. You would get the password at the point of purchase of the e-pins, so you can use it to open the e-pin file.

Kindly note that for training purpose, VM Tech Pin Extractor uses a sample epins file when

Teaching people how to use the software in printing recharge cards.

### STEP 2

Connect your printer to your computer and ensure it is working fine. You can use any printer but laserjet Printer is recommended because you will be wasting a lot of money buying ink-cartridges for deskjet printers.

# STEP 3

Download VM TECH PIN EXTRACTOR on your computer. **Install** and **Activate** it.

You can download it at: www.vmtechonline.com

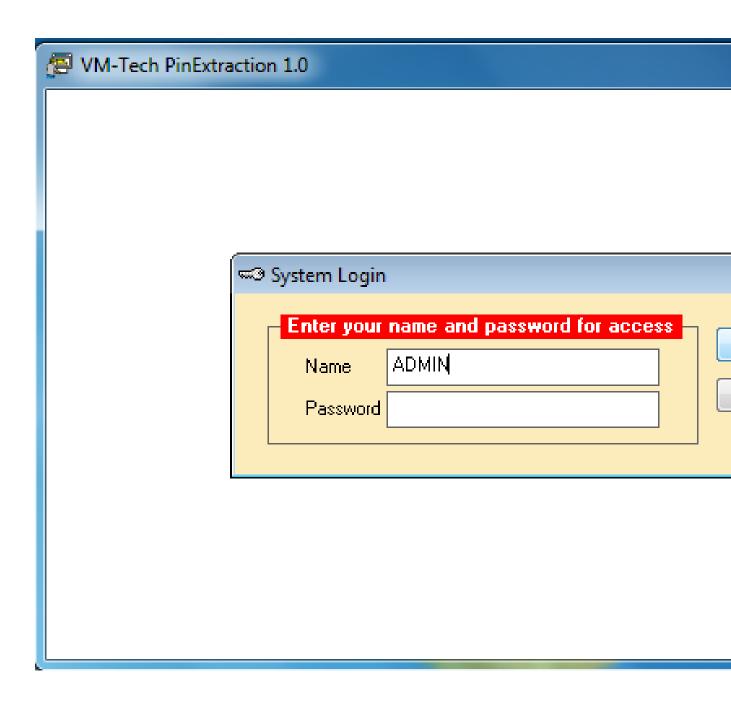

Please note the software will NOT work on smart phones. Software is for computer only. You can use any phone to print recharge card only on our e-pin portal.

After successful installation, you should notice the "VMTECH PIN EXTRACTOR" Short cut on your desktop.

Locate and Click on the Short cut of the VM TECH PIN EXTRACTOR SOFTWARE on your Desktop as shown below
